WATER CONSERVATION POLICY

Under our Ministry of Environment's Permit to Take Water, we are only permitted to use a particular amount of water per day and not to exceed it. We, therefore, have created a summer water conservation policy to facilitate this. As summer is peak water usage months, cutting back on water wastage at this time is most practical.

We are fortunate to have a large well water supply but we are also obligated under law to protect it. Regular use of water is not a problem. Although when 100 people are watering their lawn for a couple of hours on a Saturday afternoon during peak season, hundreds of thousands of litres of water literally go down the drain (or rather evaporate into the air). Brown grass in July is dormant grass, not dead. When temperatures cool, the grass will turn green and as healthy as before.

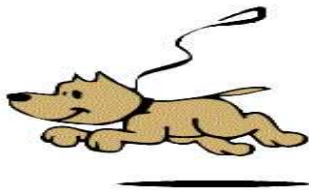

Our policy is as follows:

- 1) Water Conservation commences **June 13th**
- 2) Watering **ONLY** between 11pm and 6am for maximum of 30 minutes.
- 3) **NO sprinkler watering** unless used with a timer with auto-shut off for maximum of 30 minutes inbetween 11pm and 6am.
- 4) Watering with a hose is allowed between 11pm and 6am provided the hose has a trigger nozzle and is actively held by an individual.
- 5) Watering only permitted once per week during allowed times (if no rain)—Handwatering of flowers is permitted as needed (no sprinklers).
- 6) **No lawn/sprinkler watering at all during the weekends from June 13th to Sept. 13th.**
- 7) **NO VEHICLE** washing of any kind.
- 8) **Watering exceptions maybe applicable if we have recently laid sod which needs watering to root properly.**

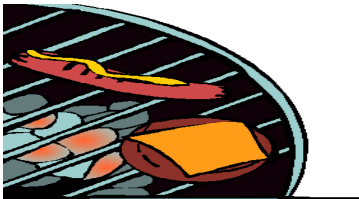

LAWN WATER FACTS:

- **Brown grass is dormant, not dead**---high temperatures and dry conditions cause this mechanism to help a lawn survive summer drought.
- **It is not necessary to water a dormant lawn at all.** It will come back lush and green when cooler temperatures return.
- **Dormant lawns** (if you prefer to water) should receive **1 inch of water every 2 or 3 weeks (not every week) for 20-30 minutes** during summer to prevent turf loss (less any rainfall).
- Over-watering dormant lawns actually harms the root system of the lawn.
- Regular green lawns (not during drought) only require **1-1½ inches of rain or watering 1x per week for 20-30 minutes.**
- **Best time to water is 4am-8am (our policy is 11pm to 6am** due to high water volume demand in the mornings) ---lower temperatures, less sunlight, less wind and evaporation (daytime watering evaporates before it penetrates the soil).

PET-ETIQUESTTE 101

We are pet friendly as everyone knows here at Quinte's Isle Campark. Pets are almost as numerous as children. Our furry friends come with a lot of care and responsibility. So please help ensure all our campers protection from harm/damage/mess or noise, we ask that all dogs be on a leash during ALL seasons and accompanied at all times (not left alone or permitted to run off the lease). Pets are not permitted in our buildings or rental trailers and pooper scooping is expected at all times. Please be mindful of your fellow neighbours, campers and other canines. Thank you
